BARONESS
Quality on Demand

Operator Safety

- * A fully certified ROPS system is provided as standard to protect the operator during slope cutting.
- * A seatbelt system is provided that moves with the operator seat platform to provide safety and comfort during slope mowing.
- * An operator protection net is provided as standard to protect the operator from golf balls.
- * A roof awning is also provided as standard to

Fully adjustable seat

- * The seat is adjustable in all directions for enhanced operator comfort.
- * The seat can tilt in both directions by up to 30 degrees so that the operator remains upright when cutting slopes. This increases operator safety and reduces fatigue to the operators back.

Even weight distribution

- * The weight of the operator and all components are distributed evenly to ensure equal pressure and traction on each wheel.
- * Minimizes wheel spin and turf damage.
- * Enhances controllability and reduces runaway tendencies.

Hydrostatic Transmission

- * Smooth and controllable.
- * Enables precision control at slow speed when cutting steep slopes.
- * Provides a fast cutting speed on flat areas.
- * Provides a fast transport speed.

Long Life Blades

- * Blades are made from a tough and hard wearing tool steel alloy.
- * Retains its sharp edge for longer thus enhancing grass condition.
- * Long life blades require infrequent changing thus reducing machine downtime and maintenance costs.

Ergonomic Control Layout

- * All controls and gauges are easily accessible to the operator.
- * Adjustable steering column.
- * A slope meter provides accurate inclination angles for enhanced operator safety.
- * Power steering is fitted as standard for easy and precise control.

Versatility & High Production

- * Can be used to cut slopes or flat ground.
- * Can be used to cut long or short grass.
- * Much higher productivity than using a grass strimmer.

Maintenance Accessibility

- * The engine cover lifts open to provide good all round engine access.
- * The engine cover can be quickly removed to provide even better access if required.
- * The coolant radiator is mounted at the front of the machine in the cleanest area ensuring low maintenance and consistent engine temperatures.

Kubota Diesel Engine

- * A powerful 23hp diesel engine provides ample power over demanding terrain.
- * World renowned reliability.
- * Excellent aftersales backup.

Superior Traction & Climbing Ability

- * Selectable 2WD/4WD.
- * A wide wheel base ensures excellent stability.
- * A low centre of gravity provides a very high slope rating.

Multiple Cutting Deck Options

- * Contour deck – provides a consistent height of cut over undulating terrain.
- * Rear Discharge Deck.
- * Side Discharge Deck
- * Mulching Deck

Wide turf tyres

- * Further enhances traction whilst keeping turf marking to a minimum.
